Summary

Organized developer with entrepreneurial spirit. Experienced building automation software for Fortune 500 company, saved over $500,000 in payroll. Contributor to pivotal shipping standard. Startup co-founder and technology consultant. Seeking a role in dev-ops with opportunity for advancement.

Experience

Co-Founder

SweetRoll LLC

May 2020 - Present (8 months +)

• Sweetroll LLC simplifies Social Media Marketing for small businesses.

• Managing Partner responsible for web application development, business operations, and financial procedures.

• Optimize product value creation, business model, and pricing framework.

• Design, build, and maintain minimum viable product.

• Develop product plan for scaling and product-market fit.

Business Analyst Intern

C.H. Robinson

Jun 2019 - May 2020 (1 year)

• Developed automation software to optimize business processes using Python, VBA, and SQL.

• Queried and Analyzed large datasets in MS SQL Server, PGAdmin (PostgreSQL), PowerPivot (Excel), and Python Notebooks (Anaconda).

• Collaborated with end-users to determine requirements and specifications.

• Designed systems with UML Class Diagrams, ER Diagrams, Use-Case Diagrams and Business Process Flow Charts in Visio and Lucidchart.

• Built customer-facing Python/Flask web app and mounted on a Linux/Apache/PostgreSQL framework.

• Created and Managed Git/GitHub repositories with 4 collaborators for 6+ development projects.

• Drafted managerial reports with actionable insights in Excel.

• Accepted 2 Internship extensions based on entrepreneurial work ethic and excellent collaboration skills.

Volunteer Coordinator

American National Standards Institute

Mar 2019 - Jul 2019 (5 months)

• Organized ISO standards meeting for international shipping consortium (BIMCO).

• Designed digitized maintenance logging system for container ships.

• Modeled processes for data interchange standardization (MS Visio).

• Collaborated on standard draft with industry experts and ISO organizers.

Senior Sales Associate

Johnston & Murphy

Nov 2014 - Jun 2019 (4 years 8 months)

• Consulted with customers, determine requirements, customize to needs, complete sales.

• Developed selling strategies based on store analytics, create reports, train team.

• Managed/ran daily operations such as: delivering cash deposits, opening/closing protocol, reporting and filing performance paperwork, and confirming product shipments and deliveries.

• Trained new employees.

• Promoted based on excellent job performance - exceeded quotas most months.

CNC Plasma Cutter Operator

AWNEX, Inc.

Jun 2014 - Nov 2014 (6 months)

• Designed and fabricated awning panels for commercial brands using CAD software.

• Operated and maintained Torchmate CNC plasma cutter, sheet metal break & shear.

• Troubleshot engineering designs (QA) and corrected flaws to assure product accuracy.

Education

Kennesaw State University

Bachelor of Business Administration - BBA, Information Systems

Jan 2015 - May 2020

The focus of my studies was how to leverage information and computer processes to attain sustainable competitive advantages.

Relevant Courses/Skills:

• Application Development (Python, Java, Android, Visual Basic, GitHub, MS Teams)

• Database Management (SQL, MS Access)

• Global IS Project Management (Work Breakdown Structures, PMBOK, MS Project)

• Business Statistics (Solver, Regression, MS Excel)

• System Analysis and Design (Software Requirements Specification)

• System Modeling (UML Class, ER, Use Case diagrams, Visio)

• Web Development (HTML, CSS, Adobe Dreamweaver, XML, JavaScript)
